Miss Helen

Subject: Urgent Referral for Special Treatment

Dear Miss Helen,

After careful diagnosis and thorough medical evaluation, we have determined that **Mr. love Sufferer** is suffering from an advanced case of **Love Deficiency Syndrome (LDS)**—a condition that can only be treated by **your love and care**.

Symptoms include frequent daydreaming about you, an uncontrollable desire to be near you, and an increasing dependency on your hugs. Traditional medical treatments have proven ineffective, leaving us with only one scientifically proven solution—**unlimited doses of your affection**.

As his assigned specialist, your prescribed treatment plan includes:

- Daily cuddles and sweet words
- Regular check-ups (also known as date nights)
- Emergency kisses in case of sudden relapses

Failure to comply may lead to severe side effects, such as excessive love letters, spontaneous poetry, and never-ending admiration for you.

We trust you will take this referral seriously and provide the best possible care.

Sincerely,
Dr. Love & The Medical Team
(Authorized Cupid Specialists)
